VARNALUX

REMOTE CONTROL FOR LED STRIP

Model No
907436

RGB, 4-zone

Product Features

Our remote can control the LED lights up to four different zones.
It controls the color, and brightness with different programs.

Technical Parameters

Model No.: 907436
Voltage: 3V(AAA * 2PCS)
Transmission Frequency: 2.4GHz
Modulation Method: GFSK
Transmitting Power: 6dBm
Standby Power Consumption: 20uA
Control Distance: 30m
Size: 120x52.5x21 mm

120mm

52.5mm

21mm

Products Key Diagram

Remark: Hold " **I** " to get white mode. Under white mode, press **'S-'** to get warm white, press **'S+'** to get cool white. Under color mode, press **'S+/S-'** for saturation control. When press 'M', S+/S- can adjust the speed of the dynamic modes.
To dim all RGBW lights at once or change the color, frist press "Master ON". to do this with individual lights, frist press "Zone ON". secondly, choose the color or brightness according to the color ring or brightness ring.

Master ON	Master OFF
Color ring	Indicator light
Brightness-	Brightness+
Speed-	Speed+
Zone ON	Modes(Programs)
Zone OFF	4×(un) Link Light

Linking & Unlinking

Remark: The light can be working after linking with the remote controller.

## Linking Instructions

1 Switch off the light and switch it on after 10 seconds.	**2** When the light is on short press any of the zone buttons " 🔵 " **1 time** within 3 seconds.	**3** The light will blink slowly 3 times which means the linking process has been successful.

⚠️ If the light does not blink slowly, the linking process has failed. Please, switch off the light again and follow the steps again.

Unlinking Instructions

|		
1 Switch off the light and switch it on after 10 seconds.	**2** When the light is on long press any of the zone buttons " 🔵 " within 3 seconds. **Unlinking must be the same zone with the Linking**	**3** The light will blink quickly 10 times which means the unlinking process has been successful.

⚠️ If the light does not blink rapidly, the unlinking process has failed. Please, switch off the light again and follow the steps again.

Grouping of several lights

You can add an endless numbers of lights to a zone on the 4 channel remote by linking the lights to different zones. This way you are completely flexible in creating different group combinations. Below you can see some grouping examples.

Remark:
1. The user can re-programme freely as needed. One remote can control countless lamps or controllers, but one lamp or controller can only be controlled by four remotes (Max).
2. Please check the battery installation and controller (totally discharge the power), when you programme after switching off and switching on.

Attention

1. This remote will work with only specified products, not all Varnalux products can be controlled with this product.
2. In the using of the remote, if the indicated lamp blinking quickly, pls change the battery in time. Please don t use poor quality battery to avoid the leaking of battery liquid to damage the remote controller.
3. Please keep your finger off the touch ring when installing the batteries, to improve its sensitivity, and use the remote (3 seconds later) after the batteries are installed. Please reinstall the batteries, if the fouch ring is found low-sensitivity.
4. This 2.4GHz remote control system is precise electronic product; don't use it in humid, high temperature, dust and high voltage environment; Saving it at indoor, dry and no static electricity environment.
5. Please don't use this remote controller in a wide-range metal area or a in a strong electromagnetic field area as it will badly affect the controlling distance.
